EDUCATION

Instituto Tecnológico de Buenos Aires
Software Engineering – GPA 8.74 [With Honors]

Buenos Aires, Buenos Aires
Mar 2020 – Jul. 2025

LANGUAGES

Spanish: Native **English:** Proficient **Japanese:** Basic

EXPERIENCE

Cloud & Platform Software Engineer (Semi Senior) – Mercado Libre Buenos Aires, Buenos Aires
(Kotlin, Java, AWS, GCP, Terraform, Docker, MySQL, Node.JS) *Oct. 2025 – Present*

- Architected and led the end-to-end development of Frontier Controller, Mercado Libre's Kotlin/Spring CDN control plane, replacing manual CloudFront configuration with versioned, vendor-neutral policies deployed through Terraform.
- Designed safe workflows for previews, planned deployments, imports, rollbacks, and force deploys, coordinating Terraform execution and verifying that approved plans remain unchanged before deployment.
- Built production reliability and migration capabilities, including drift detection, reconciliation, retries, sync status, deployment history, metrics, and notifications, plus host migrations with DNS ownership validation.
- Created an internal marketplace of AI-agent plugins and skills for querying CDN configuration through a read-only Frontier Controller API and generating change-control documents for scheduled critical operations, enabling senior-management review and approval before execution.
- Owned business-as-usual platform operations, handling routine CDN configuration changes, cloud provider console/CLI tasks, deployment follow-up, and day-to-day production needs.

Software Engineer II – Innovid Buenos Aires, Buenos Aires
(Scala, Java, Snowflake, Spark, Docker, Argo, AWS, Terraform, TeamCity) *June 2024 – Oct. 2025*

- Designed, developed, and deployed a Scala+DBT+Spark project for integrating third-party data into an identity resolution system, introducing Apache Iceberg as a cost-saving storage alternative to Snowflake.
- Implemented and debugged multiple Spark applications running on AWS processing billions of entries per day.
- Implemented a DBT project and a Kubernetes + Argo workflow for periodic data processing and delivery to identity providers.
- Maintained and added various features to existing services developed in Scala, Python, Java, DBT, and Node.js.

Software Developer – Balanz Capital Valores Buenos Aires, Buenos Aires
(Java, Golang, SQL Server, Postgres, Docker, Node.JS, AWS) *Oct. 2022 – June 2024*

- Developed a Spring Boot API to integrate with external brokers and expand the platform into U.S. equities trading.
- Developed a reporting system used daily by thousands of clients with Node.JS, SQL Server, HTML/CSS, Handlebars.JS, and Puppeteer.
- Contributed to Golang microservices and shared libraries for data processing, multi-tenant storage, error handling, and logging.

Teaching Assistant for OOP Course – ITBA Buenos Aires, Buenos Aires
(Java, Ruby, UML) *Aug. 2021 – Dec. 2022*

- Assisted in teaching Object-Oriented Programming in Java and Ruby, covering core concepts such as polymorphism, inheritance, composition, interfaces, iterators, and abstract classes.

Customer Support and Lift Operator Nagano, Japan
Shiga-kogen Ski Resort *Dec. 2019 – Feb. 2020*

TECHNICAL SKILLS

Languages: Java, Javascript, Scala, C, Golang, Ruby, HCL, Python, HTML, CSS

Databases: PostgreSQL, SQL Server, Snowflake, MongoDB, Neo4j, Redis, DynamoDB

Frameworks: Spring, Express.JS, React, Next.JS, TailwindCSS, Vue.JS, Vuetify

Other Developer Tools/Platforms: Kubernetes, Argo, Terraform, Git, Github, Bitbucket, Gitlab, Neovim, Docker, TeamCity, Gitlab CI, Makefile, AWS, VS Code, IntelliJ, WebStorm, Android Studio, JIRA

AI Tools: Cursor, Codex CLI, Claude Code, Notebook LM, Gemini CLI, Gemini Studio, ChatGPT
